DETAILED ACTION

1. Claims 1-33 are pending.

Applicant's election of Group I in the reply filed on 06/12/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-23 are examined. Claims 24-33 remaining subject matter being drawn to the non-elected invention are withdrawn per 37 CFR 1.142(b).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. ***Priority***

This application is filed on 04/02/2004, which claims benefit of 60/460,744, filed on 04/02/2003 and claims benefit of 60/476,378, filed on 06/06/2003.

3. ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1625

Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for R⁴ and Q being acid labile hydroxyl protecting as BOM, acetyl, MOM, MEM, SEM, TBS, triethylsilyl, t-butyldiphenylsilyl, triisopropylsilyl, allyl and tetrahydropyranyl does not reasonably provide enablement for fully breadth genus. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for R⁵ being oxidatively labile hydroxyl protecting as PMB or MPM, does not reasonably provide enablement for fully breadth genus. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.
